Article:	Annex:	Clause: Fil	Clause: Filters (Marking)	
Key words: Gas and combined filters, colour marking				
Question:				
In some cases, the filters are sold in different markets and/or tested according to different standards.				
This is reflected by clearly separated markings. The requirements for marking also may differ in terms of the colour code used to indicate performance for protection against gases or particles.				
In addition to the colour coding according to EN 14387:2004 + A1:2008 and to EN 14387:2021, can Notified Bodies also admit other clearly separated colour codes in conjunction with their clearly separated marking?				
Solution: Yes, Notified Bodies can admit different colour codes if the marking to the different standards is clearly identified and separated on the filter and clearly explained in the instruction for use
