Question related to PPE Regulation EN/prEN: EN 137:2006 Other:

Article: Annex: Clause:

Key words: Respiratory Protective Equipments, flame engulfment test, bulky devices

Question:
EN 137:2006, method 7.4.1.3 figure 3 specifies the distance between the burner plates.
How should the test been carried out for large devices, where the space between the burner plates and the nearest point of the device becomes smaller than 50 mm?

Solution:
Adjust the burner plate(s) position(s) so that the minimum distance between the nearest point of the device and the burner plate(s) becomes 50 mm. This shall be achieved without changing the manikin's position which shall remain in the centre of the original configuration of the burner plates.
