|   | <b>CO-ORDINATION OF NOTIFIED BODIES</b><br><b>PPE Regulation 2016/425</b><br><br><b>RECOMMENDATION FOR USE</b>  | PPE-R/02.003<br>Version 1 |
| Number of pages: 1<br><br>Origin : Vertical Group 2  | Approval stage :                      Approved on :<br><br><input checked="" type="checkbox"/> Vertical Group                      21.04.2018<br><input checked="" type="checkbox"/> Horizontal Committee                      21.04.2018<br><input checked="" type="checkbox"/> EU PPE Working Group                      29.11.2019 |                           |
| Question related to <input type="checkbox"/> PPE Regulation <input type="checkbox"/> EN/prEN: All standards <input type="checkbox"/> Other:  |   |                           |
| Article:                                      Annex:                                      Clause:  |   |                           |
| Key words: Variations, conformity  |   |                           |
| Question:<br>How to treat the many variations of essentially the same equipment?<br>e. g. a turbo unit with a series of different facepieces / hoods and filters.<br>How many tests should be performed? |   |                           |
| Solution:<br>Perform as many tests as needed to verify the conformity of all elements in the different versions of the equipment also perform tests to verify the conformity of the complete equipment.  |   |                           |
| Comment:<br>This suggestion was made that Notified Bodies should make their own decisions to establish the same testing procedures for all testhouses.   |   |                           |
