Question related to PPE Regulation

EN/prEN: EN1078:2012

Other:

Article:

Annex:

Clause:

Key words: Camera attachment

Question:

Is it possible to certify bicycle helmets with special accessories designed to allow fitment of a camera?

Solution:

Yes.

Rationale:

Cameras integrated into helmets in a way that does not create a significant additional projection from the helmet, can be certified.

The presence of a fitting or camera in a way that causes a significant projection should be avoided, as such projections may cause additional risks to the user (e.g. snagging).

In all cases, the manufacturer should identify and consider the additional risk arising from the presence of the fitting or camera, and the notified body should determine what additional tests should be performed.
