Question related to	<input checked="" type="checkbox"/> PPE Regulation	<input checked="" type="checkbox"/> EN/prEN: EN 361 :2002, EN 364:1992	<input type="checkbox"/> Other:
Article:	Annex:	Clause: 4.3 / 5.1.4	
Key words: Harness, static strength			
Question: In EN 364: 1992 clause 5.1.4, static strength is required to be carried out both between the harness attachment element and the lower ring of the torso dummy (15 kN), and between the harness attachment element and the upper ring of the torso dummy (10 kN). Can a new sample of EN 361:2002 harness be used for each of these tests, or should both tests be carried out consecutively on the same sample?			
Solution: Each test may be carried out on a new sample of EN 361:2002 harness
