Question related to PPE Regulation

EN/prEN: EN 361:2002

Other:

Article:

Annex:

Clause:

Key words:

Full body harness: front loops

Question:

Who is responsible for using the right connector to form the front attachment point of a full body harness which comprises two attachment elements e. g. webbing loops or D rings?

Solution:

The manufacturer is responsible to specify exactly the type of connector e. g. type / model which should be detailed within the PPE user instructions.

If the manufacturer supplies a connector with the harness, the connector will be tested statically to EN 361:2002 in the most unfavourable axis, while attached to the harness
