Article:	Annex:	Clause: 7.4.2 f), 7.10.1 f) and 7.11.1 f)	

Key words: Impact protection - Contact with the eye of the test headform

Question:
The “eye of the test headform” is not specified. How shall it be determined if contact of the ball or the protector with the eye of the test headform has occurred?

Solution:
If, when testing in accordance with 7.4, 7.10 or 7.11, there is indication of contact within the areas defined by the frontal impact and lateral impact points, contact with the eye of the test headform should be deemed to have occurred.
