Key words: Dual-marking			
Question: Is it possible to approve a product dual-marked for compliance with EN397:2012 + A1:2012 and EN12492:2012?			
Solution: Yes. One way to achieve this is described below. In principle, the helmet shall satisfy the design and performance requirements of each standard. In order to do this, the product can be provided with two chin-straps, one to satisfy the retention system requirements of EN397 and the other to satisfy the retention system requirements of EN12492. In such a case, the chinstraps must be very clearly labelled as to the applicability for each standard and the user instructions shall state clearly how the helmet is to be configured in order to satisfy each standard.
